OPPORTUNITY

For one organization, lost office equipment and computers resulted in an annual loss of thousands of dollars and endless hours of frustration.

SOLUTION

With MobileAsset, the facilities manager can instantly access where an asset is, who is responsible for it, and even what it looks like! Using a Wasp mobile device with an integrated scanner, easily audit assets, maintain an asset's condition, quickly move assets between locations, and dispose assets on the spot. With the MobileAsset 5-networked PC version, departments can view and share each other's assets. Eliminate unnecessary purchases, unaccounted loss, and the endless hours and frustration of searching for lost assets.

OPPORTUNITY

For this maintenance shop, tools had a bad habit of disappearing.

SOLUTION

With MobileAsset, the shop supervisor can check-out and check-in tools. With check-out/in, the supervisor can quickly view who has a tool and when it is due back. With a Wasp mobile device, the supervisor can print check-out and check-in receipts to a supported Wasp mobile printer. Also, MobileAsset allows the supervisor to attach image, document, warranty or any type of file to any asset for maximum accuracy and tracking. For tools that need maintenance or calibration – no problem. MobileAsset gives the supervisor the features to schedule, assign and record maintenance actions.

OPPORTUNITY

This school district is requiring each school to keep track of every piece of equipment whether it be a desk, computer or a musical instrument.

SOLUTION

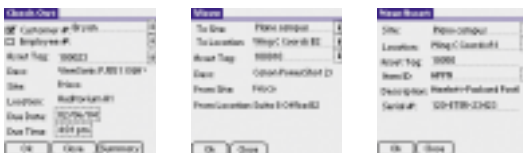

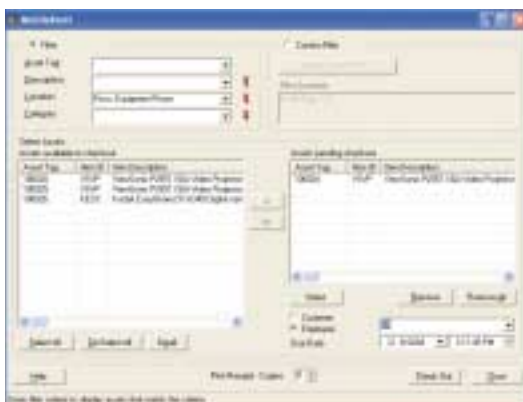

Using MobileAsset would allow each school to keep track of their fixed assets with great detail using a Wasp mobile device and a PC. MobileAsset gives them the ability to track their assets by asset tag, location and student so the band director can run a report to let him know where each instrument is at all times. Using check-in and check-out, the audiovisual technician can loan out items and know who has them and when they are due back. Also, MobileAsset has over 40 reports available for quick access to asset information. They can also print asset tags using our included Labeler program. This kit is a Ready-to-Use solution for this school district's asset tracking needs!
